

WINTER SCIENCE

Outdoor Play

- 1. Roll snowballs down an inclined plane.**
- 2. Stack snowballs one on top of the other.**
- 3. Make footprints in the snow. Measure the distance between footprints.**
- 4. Measure the length of your footprint.**
- 5. Toss snowballs at targets set at different distances from the start line.**
- 6. Construct a maze or obstacle course with piles of snow.**
- 7. Follow the leader: make a trail with footprints in the snow for others to follow.**
- 8. Measure the depth of the snow.**
- 9. Place some snow on a tray to observe melting and/or freezing.**
